

## **CARING FOR THE CARERS**

“As a full time carer of my husband, I would like to share my experience of the help and support which we have received from the staff of CABA.

My husband Brian has suffered from a long, chronic illness and is now partially sighted with poor mobility – he also has the onset of dementia.

It was a great relief to be able to discuss with CABA’s Carer Support Worker and a Case Officer, the worries and fears I have for our future. The meeting was carried out in the privacy of our own home.

Our needs and assessment were sensitively dealt with. We received useful information about local home care agencies. A safe shower seat and a portable ramp for easier access for the wheelchair were promptly provided. We were also delighted to receive a Christmas hamper.

It has been a very good experience to meet with members of the CABA team, who have dealt with our problems with care and professionalism. It is a huge relief to know there is always someone to whom I can turn.”
